

Microsoft Power BI + Xoriant

Qualify for a Custom Workshop and
Proof of Concept Investment

Data is the lifeline of modern business

Transform your complex, siloed data into valuable and actionable insights with Microsoft Power BI. Simplify data collection and analysis leveraging popular Azure services and share insights across your organization.

Xoriant and Microsoft Power BI makes 'business at your fingertips' a reality with secure, easy to understand manageable dashboards.

Contact us to sign up for your free demo and see if you qualify for a free workshop tuned to your individual business needs.

We may even invest in a proof of concept for you to trial in production.

Interactive Power BI Charts With 'What If' Analysis

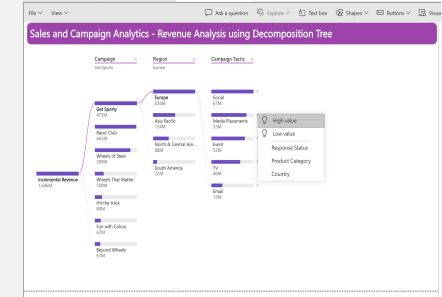

Create actionable insights from billions of records

Perform Q&A using natural language

Visualize data across multiple dimensions using decomposition

- Build insights by integrating disparate huge quantities of data sources into Power BI
- Utilize machine learning features to help users analyze data, spot valuable trends, and make educated predictions
- Create powerful personalized dashboards to allow businesses to better make sense of their data
- Set up KPI alerts to keep users informed on important metrics and measurements
- Build an intuitive interface to navigate complex spreadsheets
- Integrate with popular business management tools like SharePoint, Azure Synapse, IoT, Office 365, and Dynamics 365, including non-Microsoft products like Spark, SAP, Salesforce, and Mailchimp
- Ensure data safety with granular controls on accessibility
- Embed Power BI charts into current business applications
